## Cloud Based Database Solutions

**cloud database database as a service** - makes the cloud database structure different from the rational database management system. this makes the structure of the cloud database a complex one. there are multiple nodes across a cloud database, designed for query services, for data centers that are located in different geographical locations and the corporate data centers as well. **cloud based distributed databases: the future ahead** - with the cloud supra structure i.e. having a control domain at top with service provider clouds at first level with distributed databases, the accessibility of required data can be carried out. henceforth, we can say that distributed database can be configured in a cloud form with having accessibility of data from anywhere over the internet. **ten things to ask your software-as-a-service vendor before ...** - are key to the successful deployment of cloud-based services. containing 10 tips based on best practices gleaned from industry analysis and direct experience with thousands of cloud deployments, this paper draws on conversations with cios, program and project managers, it directors, engineers, developers, administrators, and **oracle brings the cloud to you** - oracle database exadata cloud at customer: this solution combines the simplicity, agility, and elasticity of a cloud-based database deployment with oracle exadata performance. it is identical to oracle database exadata cloud service and oracle exadata as a dedicated on-premises machine, but the infrastructure is managed by oracle cloud experts **database management challenges in cloud environment** - database management challenges in cloud ... it is based on various parameters like database systems in the cloud, scalability and elasticity, autonomy or self-managing database ... **cloud computing benefits, risks and recommendations for ...** - 5 cloud computing benefits, risks and recommendations for information security there are three categories of cloud computing: -software as a service (saas): is software offered by a third party provider, available on demand, usually via the internet configurable remotely. **taxing software and cloud computing: yesterday's law ...** - sions based on the rationale that software is used to provide cloud-based services. this article looks at the evolution of the application of sales and use taxes to software transactions and how these policies are being applied to cloud computing models. only one thing is certain: tech-nology evolves faster than the law, leaving busi- **evaluation of cloud computing services based on nist 800-145** - retire associated legacy systems for each type of cloud-based service as well as the same for retiring legacy systems, as applicable, for planned additional cloud-based services. 1 this effort is consistent with the nist role per the national technology transfer and advancement act (nttaa) of 1995, which became law in march 1996 **itil asset and configuration management in the cloud** - amazon web services - itil asset and configuration management in the cloud page 1 introduction leveraging the experiences of enterprise customers who have successfully integrated their cloud strategy with their it infrastructure library (itil)-based **case study on cloud based library software as a service ...** - academic settings. using cloud based, web based, and other remote services may bring both advantages and disadvantages, some of which this paper will bring out. first, a brief literature review of the academic literature, and a review of available general-purpose cloud-based library products are conducted.
